Current SES Rotation Announcements
as of 07/19/2022

Announcement No: DERA20004
Rotation Type: EXECUTIVE REASSIGNMENT/TRANSFER
Title: MANAGER, KANSAS CITY FIELD OFFICE
Location: MO
Length (Months): 0
Required Clearance: Top Secret (TS)
Agency POC: Annetta Ross - annetta.ross@nnsa.doe.gov (202-586-1788)

This vacancy is posted on usajobs announcement number 20-NA-KCFO-XE-00489; open 4/10/20 and closes 5/11/20. USAjobs link is https://www.usajobs.gov/GetJob/ViewDetails/565317200

This position does have a positive education requirement in Engineering (801 series) or Physical Science (1301 series).

The incumbent of this position serves as Manager, Kansas City Field Office, reports directly to the NNSA Administrator, and is responsible for overall management and executive direction of technical programs, projects, and activities performed by the KCFO. The KCFO Manager also has responsibility for NNSA operations under the Kansas City National Security Campus (KCNSC) contract; a multi-year $3.25 billion dollar contract. The KCNSC is responsible for manufacturing and procuring 85% of the nation's non-nuclear weapon components. This includes operations in Kansas City, Missouri, and Albuquerque and Los Alamos, New Mexico and covers a diverse set of manufacturing and procurement activities for NNSA and national security customers. Products include electronic, mechanical, and engineered material components.

The incumbent is responsible for the administration and oversight of the performance of the Management and Operating (M&O) contract at the Field Office, direction to the support of NNSA and non-NNSA programs, and ensuring adequate safety, security, and control of operations. Additionally the incumbent implements Field Office-specific plans; manages infrastructure and facilities program execution; implements environmental, safety, health, and business management programs to ensure proper controls and oversight at the Field Office that are sensitive in nature and have the potential to impact both the Field Office and the entire NNSA enterprise. Oversees implementation of environmental, safety and health programs at the Field Office and interfaces with the Defense Nuclear Facilities Safety Board on Field Office-specific issues.

The position is a Senior Technical Safety Manager (STSM) position and requires the incumbent to be a qualified STSM or have the ability to qualify as an STMS under the Technical Qualification Program within the timeframe specified by the program.

A DOE ‘Q’ level clearance is required.

This position is subject to SES mobility.
An historic increase in unaccompanied children (UC) referrals to ACF’s Office of Refugee Resettlement (ORR) has placed incredible demands on its UC Program. Due to this influx, as well as the COVID-19 pandemic which limited State-licensed bed capacity, ORR opened numerous Emergency Intake Sites to shelter UC while awaiting reunification with their sponsors in America.

ORR is soliciting interest from SES for the role of Site Director. These individuals lead diverse teams, interact with a multitude of stakeholders, and run 24/7 operations to ensure the health, safety, and well-being of UC in care while working to reunify them. This is a high-profile position. Site Directors act as principal federal representatives and liaise regularly with ORR leadership in Washington while overseeing federal staff, operations, and processes.

The position requires strong management, collaboration, and communication skills to be utilized in a constantly evolving environment. Expertise in relationship management is essential. Site Directors meet frequently with contractor leadership to communicate expectations and to ensure regulatory and contractual compliance.

A longitudinal observation of previously successful SES Site Leads demonstrates that the skillsets required to attain, and excel at, a position within SES suggests the capacity, and likelihood, to be successful within this detail.

This is a reimbursable, field-based detail. Travel, lodging, and per diem will be paid by ORR.

Serves as one of two Deputy Associate Administrators and Chief Medical Officer. Provides executive leadership for issues regarding clinical quality, clinical policy and evidence-based decision-making for BPHC programs.

Reviews clinical/medical implications of BPHC policies and procedures and advises the Associate Administrator of their impact on BPHC programs.

Keeps abreast of the rapidly changing priorities in health care delivery and provides authoritative medical advice in the development of clinical policies that incorporates the programmatic and legislative requirements of the BPHC programs.

Provides executive leadership and direction to ensure integration of clinical quality improvement into all aspects of health center operations. Identifies and develops best practices and techniques in clinical quality improvement. Develops and collaborates on clinical initiatives which promote clinical quality improvement.

Leads in the design and operational refinement of an integrated BPHC data and information system, which includes tools for measuring the impact and health outcomes of BPHC Programs, and supports analyses of data to identify opportunities to improve care and assess success of improvement interventions. Identifies, prioritizes, and develops system content to advance clinical and health related aspects for future initiatives.

Represents the Bureau/Agency by fulfilling a variety of speaking engagements and presenting the BPHC’s programs to professional and lay groups, State and local agencies, national and organizations.

Participates in, and contributes to, meetings and conference with top level agency/departmental officials, senior program managers and subject matter specialists, counterparts from other Federal, State, and local governmental agencies, constituent groups and others to discuss and explain policies, plans and programs as they relate to clinical activities.
