How to start a charging session

Go to this link to learn how to start a charging session. For more information please visit the ChargePoint FAQs page.

Guidelines

If you enable notifications in the app, it will advise when your car is charged. To accommodate others, consider moving your vehicle to another parking space within the courtyard so that other vehicles may access the charging station.

As the program grows, the Office of Personal Property and Transportation Management (OPPTM) may establish additional guidelines.

Costs

The charging cost is $.65 per kilowatt hour (kWh), subject to change. The charging fee is calculated based on the Department of Energy's Federal Workplace Charging Fee Calculator.

If you have any questions, please contact OPPTM-Feedback@doc.gov.
