U.S. Department of Commerce Privacy Impact Assessment NOAA/NMFS/PIFSC

Unique Project Identifier: NOAA4960

Introduction: System Description

Provide a brief description of the information system.

Bounded by the Hawaiian Archipelago, American Samoa and U.S. Pacific Remote Island Areas, and the Marianas Archipelago, the Pacific Islands Fisheries Science Center (PIFSC) encompasses the largest geographical area within the National Oceanic & Atmospheric Administration's (NOAA's) Fisheries' jurisdiction. The information system supports business operations typically found in scientific and administrative offices within the federal government for the following divisions:

The Ecosystem Sciences division conducts multidisciplinary research, monitoring, and analysis of integrated environmental and living resource systems in coastal and offshore waters of the Pacific Ocean.

The Fisheries Research and Monitoring division coordinates the Center's programs for fisheries monitoring, fisheries data management, fisheries interactions, fish life history studies, and stock assessment, working within the confines of the Magnuson-Stevens Fishery Conservation and Management Act.

The Protected Species division provides the scientific foundation for the conservation of cetaceans, Hawaiian monk seals, and sea turtles in the Pacific Islands, guided by mandates of the Marine Mammal Protection Act, Endangered Species Act, and international agreements.

The Operations, management and Information division provides high quality customer service, oversight, and the technical tools necessary to help further the success of the PIFSC and NOAA mission, while ensuring compliance with agency policies and regulations.

Address the following elements:

- (a) Whether it is a general support system, major application, or other type of system

 The NOAA Fisheries Pacific Islands Fisheries Science Center Local Area Network (LAN) functions as an overall General Support System (GSS).
- (b) System location
 PIFSC is located in Honolulu, Hawaii.

(c) Whether it is a standalone system or interconnects with other systems (identifying and describing any other systems to which it interconnects)

NOAA4960 interconnects with NOAA0100, NOAA Cyber Security Center, for security event logging and incident response.

NOAA4960 interconnects for network transit purposes with NOAA1200, NOAA Corporate Services Local Area Network.

NOAA4960 interconnects with NOAA4920 to facilitate exchange of fisheries observer and logbook data.

NOAA4960 utilizes a wide area network link to NOAA4000 to facilitate data interconnection between other systems within the bureau and access to various corporate services.

NOAA4960 interconnects with NOAA4600, accessing bioinformatics applications.

(d) The way the system operates to achieve the purpose(s) identified in Section 4

The PIFSC servers and workstations are designed and configured to satisfy the complex scientific and general data process computer needs of fishery, ecologic, stock assessment, oceanographic and protected resources data as well as administrative data used for human resources, Federal budget, Federal property, procurement (pre-decisional documents), and safety information.

(e) How information in the system is retrieved by the user

Information in the system is retrieved by users operating government furnished equipment such as desktops or laptops connected to the local area and virtual private network. Users are required to have an account to access and retrieve information. Fishermen can request their own PII/BII and the information is shared with them via encrypted e-mail or hard copy.

(f) How information is transmitted to and from the system

Information is transmitted to and from the system by:

- Direct data entry
- Electronically transmitted by vessels at sea
- Data exchange via interconnected services to facilitate sharing of vessel logbook and longline observer data
- Hand-carried data on removable media gathered from research expeditions
- Use of Google G.Suite (E-mail, Google Docs)
- Use of DOC Kiteworks to transmit sensitive PII outside of NOAA
- Use of Secure File Transfer Protocol services
- Download of publicly available research data from various internet sources

(g) Any information sharing

With regard to the transmission of human resource related data, staff utilize the U.S. DOC Kiteworks Secure File Transfer service. Human resource data may also be shared using Google Workspace for NOAA recipients only. Human resource information is sent to NOAA Office of Human Capital Services (OHCS).

PII is shared with the Department of Commerce Western Region Security Office to process security clearances. Security clearances are transmitted to the DOC Office of Security staff located at the NOAA Seattle Campus with provided computers in the NOAA NOAA1200 system.

Human resources staff in NOAA4960 provide PII data contained within the Navy base access form to NOAA Inouye Regional Center (IRC) personnel to facilitate building access. Foreign national employee and visitor/guest PII is gathered and shared with NOAA headquarters Foreign National Registration System on NOAA1101 to approve access.

Trip, effort, and catch information for the longline logbook electronic submissions is shared with the NOAA Fisheries Office of Science and Technology and Fisheries Office of Law Enforcement. The fisherman reported longline data includes vessel permit and name; departure/return dates and ports; set dates, times, and locations; retained/discarded fish counts; and any protected species interactions (if any).

Information may be shared within the bureau, with DOC bureaus and other Federal agencies in case of breach.

NOAA also shares longline data with the State of Hawaii fisheries pursuant to a Memorandum of Understanding (MOU). The information shared is: vessel name, permit number (longline fishing permit number, Coast Guard vessel registration number), and commercial marine license (CML) number issued by the State of Hawaii. This information is transferred from NOAA4960 to the Hawaiian fisheries using a virtual private network (VPN) and Remote Desktop.

(h) The specific programmatic authorities (statutes or Executive Orders) for collecting, maintaining, using, and disseminating the information

(i)	Programmatic Authorities (Introduction h.)	Type of Information Collected (Introduction h.)	Applicable SORNs (Section 9.2)
1.	5 U.S.C. 1302, 2951, 3301, 3372, 4118, 5379, 8347	Personnel Actions Including Training	OPM/GOVT-1
	Executive Orders 9397, as amended by 13478, 9830, and 12107		
2.	44 U.S.C. 3101	Personnel Actions Including Training	COMMERCE/DEPT-18
	Executive Orders 12107, 13164		
	41 U.S.C. 433(d)		
	5 U.S.C. 5379		
	5 CFR Part 537		
	Executive Order 12564		
	Public Law 100-71		
	Executive Order 11246		
	26 U.S.C. 3402		
3.	31 U.S.C. 66a	Personnel Actions Including Training	COMMERCE/DEPT-1
	44 U.S.C. 3101, 3309		
	Title 5 U.S.C.		
4.	Electronic Signatures in Global and National Commerce Act, Public Law 106-229	Badging & CAC Issuance	COMMERCE/DEPT-18
	5 U.S.C. 301		

6.	Executive Order 12107	Employee Performance Info	OPM/GOVT-2
	5 U.S.C. Sections 1104, 3321, 4305, and 5405		
7.	Executive Order 12656	Emergency Preparedness/COOP	COMMERCE/DEPT-18
	Federal Preparedness Circular (FPC) 65, July 26, 1999

	Coronavirus Aid, Relief, and Economic Security (CARES) Act, Public Law 116-136		
	Div. B., Title VIII, sec. 18115, 134 Stat. 574 (codified in 42 U.S.C. 247d note)		

21 U.S.C. 360bbb-3	
Rehabilitation Act, 29 U.S.C. 701 et. seq.	
Americans with Disabilities Act of 1990, as amended, 102(d), 42 U.S.C. 12112(d)	
29 CFR part 1602; 29 CFR part 1630	
Medical Examinations for Fitness for Duty Requirements, including 5 CFR part 339	
Workforce safety federal requirements, including the Occupational Safety and Health Act of 1970, Executive Order 12196, 5 U.S.C. 7902	
29 U.S.C. chapter 15 (e.g., 29 U.S.C. 668), 29 CFR part 1904, 29 CFR part 1910, and 29 CFR part 1960	
Genetic Information Nondiscrimination Act of 2008, 42 U.S.C. 2000ff to ff-11, and 29 CFR part 1635	

(j) The Federal Information Processing Standards (FIPS) 199 security impact category for the system

The FIPS security impact category is **Moderate**.

Section 1: Status of the Information System

X	This is a new information	system.		
	This is an existing inform	ation system with changes the	hat create new privacy risks	S.
	(Check all that apply.)			
	That Create New Privacy Ris	ks (CTCNPR)		
a. Convers	sions	d. Significant Merging	g. New Interagency Uses	
o. Anonyr	mous to Non- Anonymous	e. New Public Access	h. Internal Flow or Collection	
Manag	cant System gement Changes	f. Commercial Sources risks (specify): Unmanned aerial	i. Alteration in Character of Data	
Competiti		oursuant to Presidential Memorand vacy, Civil Rights, and Civil Libe		ned
	_	ation system in which chang pproved Privacy Impact Ass		cy ris
	This is an existing inform	ation system in which chang	ges do not create new priva	

2.1 Indicate what personally identifiable information (PII)/business identifiable information (BII) is collected, maintained, or disseminated. (Check all that apply.)

Identifying Numbers (IN)							
a. Social Security*	X	f.	Driver's License	X	j. Financial Account	X	
b. Taxpayer ID		g.	Passport	X	k. Financial Transaction		
c. Employer ID		h.	Alien Registration	X	l. Vehicle Identifier		
d. Employee ID		i.	Credit Card		m. Medical Record		
e. File/Case ID							

n. Other identifying numbers (specify):

^{*}Explanation for the business need to collect, maintain, or disseminate the Social Security number, including truncated form: PII (Social Security Number, Driver's License, Passport #) for new federal hires, various forms pertaining to onboarding are scanned and transmitted via Kiteworks. Once transmitted, the information is deleted from the information system. Security onboarding forms are sent to the DOC WSRO via Kiteworks or FedEx. Employee onboarding forms are sent to the DOC OSE001 Enterprise Services Enabling Technology ServiceNow (ESET-SN) System via a submission link on their website.

General Personal Data (GPD)								
a. Name	X	h.	Date of Birth	X	o. Financial Information X*			
b. Maiden Name	X	i.	Place of Birth	X	p. Medical Information			
c. Alias	X	j.	Home Address	X	q. Military Service X			
d. Sex	X	k.	Telephone Number	X	r. Criminal Record			
e. Age	X	1.	Email Address	X	s. Marital Status X			
f. Race/Ethnicity	X	m.	Education	X	t. Mother's Maiden Name X			

g. Citizenship X n. Religion	
--------------------------------	--

u. Other general personal data (specify):

^{*} For federal employees, pay plan, occupational code, grade/level and state/rate for personnel actions. Sales costs in fishing logbooks.

W	ork-Related Data (WRD)					
a.	Occupation	X	e. Work Email Address	X	i. Business Associates	X
b.	Job Title	X	f. Salary	X	j. Proprietary or Business Information	X
c.	Work Address	X	g. Work History	X**	k. Procurement/contracting records	X
d.	Work Telephone Number	X	h. Employment Performance Ratings or other Performance Information	X		

l. Other work-related data (specify):

^{*}Work History data is contained within resumes of applicants. Salary information is stored within employee onboarding documents.

Dis	Distinguishing Features/Biometrics (DFB)									
a.	Fingerprints	X*	f.	Scars, Marks, Tattoos	X**	k. Signatures	X			
b.	Palm Prints		g.	Hair Color	X	I. Vascular Scans				
c.	Voice/Audio Recording	X***	h.	Eye Color	X	m. DNA Sample or Profile				
d.	Video Recording	X***	i.	Height	X	n. Retina/Iris Scans				
e.	Photographs	X	j.	Weight	X	o. Dental Profile				

p. Other distinguishing features/biometrics (specify):

^{***} Observer or camera on vessel recording video and audio monitoring bycatch. UAS video footage from at-sea operations.

Sys	System Administration/Audit Data (SAAD)							
a.	User ID	X	c.	Date/Time of Access	X	e.	ID Files Accessed	X
b.	IP Address	X	f.	Queries Run	X	f.	Contents of Files	X
g. (g. Other system administration/audit data (specify):							

Other Information (specify)

Vessel permit and name; departure/return dates and ports; set dates, times, and locations; retained/discarded fish counts; and any protected species interactions.

2.2 Indicate sources of the PII/BII in the system. (Check all that apply.)

Directly from Individual about Whom the Information Pertains								
In Person	X	Hard Copy: Mail/Fax	*X	Online	X			
Telephone	X	Email	X					

Other (specify): *When SSNs are received via FedEx the information is contained within the FedEx packet, and no SSN information is visible outside of the box. The documents are then electronically submitted to the Western Region Security Office and the documents are shredded and the electronic file deleted.

^{*}For onboarding personnel: These are recorded on a stand-alone station and retained only until receipt is confirmed by OSY.

^{**} These may be on photographs of employees.

Government Sources						
Within the Bureau	X	Other DOC Bureaus		Other Federal Agencies		
State, Local, Tribal X Foreign						
Other (specify):						

Non-government Sources					
Public Organizations Private Sector X Commercial Data Brokers					
Third Party Website or Applica	ntion				
Other (specify): Foreign national PII data is collected to facilitate access to federal facilities.					

2.3 Describe how the accuracy of the information in the system is ensured.

The PII is scanned and stored, not inputted. BII obtained by logbook is hand input via data entry or electronically transmitted. Once input, a series of quality control error checking processes ensure integrity of the data. Access to BII/PII is provided on a need to know basis and the principle of least privilege is applied. Electronic monitoring data is stored encrypted at rest and locked in a read-only state.

2.4 Is the information covered by the Paperwork Reduction Act?

X	Yes, the information is covered by the Paperwork Reduction Act. Provide the OMB control number and the agency number for the collection. OMB Control No. 0648- 0214, -0218, -0360, -0441 -0456, -0462, -0463, -0490, -0577, -0612, -0635, -0649, -0664, -0755, 0607-1018, 3206-0160, 1510-0007, 3206-0160, 3206-0173, 3206-0182.
	No, the information is not covered by the Paperwork Reduction Act.

2.5 Indicate the technologies used that contain PII/BII in ways that have not been previously deployed. (Check all that apply.)

Technologies Used Containing PII/BII Not Previously Deployed (TUCPBNPD)				
Smart Cards Biometrics				
Caller-ID	Personal Identity Verification (PIV) Cards			
Other (specify):				

X	There are not any technologies used that contain PII	I/BII in ways that have not	been previously deployed.
---	--	-----------------------------	---------------------------

Section 3: System Supported Activities

3.1 Indicate IT system supported activities which raise privacy risks/concerns. (Check all that

apply.)

Activities				
Audio recordings	X	Building entry readers		
Video surveillance	X	Electronic purchase transactions		
Other (specify): Transmission of fishing vessel logbook data to the NOAA Fisheries Office of Science and				
Technology and WAN containing PII/BII from members of the public. Voice/audio recording and video recording				
onboard fishing vessels. Unmanned Aircraft Systems (UAS) conducted at-sea.				
There are not any IT system supported activities which raise privacy risks/concerns.				

Section 4: Purpose of the System

4.1 Indicate why the PII/BII in the IT system is being collected, maintained, or disseminated. *(Check all that apply.)*

Purpose			
For a Computer Matching Program		For administering human resources programs	X
For administrative matters	X	To promote information sharing initiatives	
For litigation	X	For criminal law enforcement activities	X
For civil enforcement activities	X	For intelligence activities	
To improve Federal services online		For employee or customer satisfaction	
For web measurement and customization	X	For web measurement and customization	
technologies (single-session)		technologies (multi-session)	

Other (specify): To facilitate vessel owner/operator access to electronic logbook data which is to be hosted by the NOAA Fisheries Office of Science and Technology. Electronic monitoring data is shared with service providers as part of a pilot project with NOAA Fisheries WAN.

Section 5: Use of the Information

5.1 In the context of functional areas (business processes, missions, operations, etc.) supported by the IT system, describe how the PII/BII that is collected, maintained, or disseminated will be used. Indicate if the PII/BII identified in Section 2.1 of this document is in reference to a federal employee/contractor, member of the public, foreign national, visitor or other (specify).

(a) PII is collected for both contractor and federal employee personnel designated to work with PIFSC. This is information collected for several administration and business functions for the PIFSC:

- 1. Recall and notifications for Contingency Plan (CP) Planning
- 2. Incident Response Plan (TRP) and outage notification/escalation
- 3. System Account Management process (i.e. Requesting accounts, approving accounts, terminating accounts etc.)
- 4. Records of required classes and participants to ensure completion by applicable employees.
- (b) A digital and hard copy of each federal employee's hiring package submitted to PIFSC is stored in a secured environment. This includes background checks, Employee Address

CD-525, Declaration for Federal Employment OF-306, Health Benefits Election Form OPM SF-2809, Direct Deposit Sign-Up Form SF-1199A, Designation of Beneficiary SF-1152, Self-Identification of Handicap SF-256, Designation of Beneficiary - FERS SF-3102, Statement of Prior Service SF-144, Instructions for Employment Eligibility Verification Form I-9 (with copies of identification), and employee benefits. In some cases, these forms are digitally scanned and transmitted within the bureau or intergovernmentally.

- (c) For contractual purposes, the PIFSC LAN stores procurement and contract information, stored in a restricted area of the shared drive accessible only by authorized personnel.
- (d) The PTFSC Office of Management and Information services specialists, aka the Departmental Sponsor/NOAA (DSN) under NOAA Administrative Order (NAO) 207-12, collects and maintains information from federal employees requiring federal passports, and visitors, volunteers and foreign nationals for permission to access federal facilities. See NAO 207-12 (https://www.noaa.gov/organization/administration/nao-207-12-technology-controls-and-foreign-national-access)
- (e) Other PII and proprietary BII from fishermen's logbooks include:
 - 1. Captain and vessel name
 - 2. Permit number
 - 3. Fishing locations
 - 4. Fishing methods
 - 5. Catch information
 - 6. Sales costs

Collection of fisherman logbook data helps ensure accurate and timely records about the fishing activity of persons licensed to participate in fisheries under Federal regulations in the Pacific Islands Region.

This information is maintained locally with PIFSC systems and is used for research and regulatory purposes (the latter may include civil and criminal law enforcement and possible litigation) with respect to the fisheries regulation in the Magnuson-Stevens Fishery Conservation and Management Act. Trip, effort, and catch information for the longline logbook electronic submissions is shared with the NOAA Fisheries Office of Science and Technology (NOAA4000). The fisherman reported longline data includes vessel permit and name; departure/return dates and ports; set dates, times, and locations; retained/discarded fish counts; and any protected species interactions (if any). Electronic logbook data is collected from members of the public.

- (f) PII is collected from visitors, volunteers and foreign nationals to facilitate access to federal facilities. The information is shared with NOAA to grant access to the NOAA Inouye Regional Center located on Ford Island, Hawaii.
- (g) PII and BII are collected from the NOAA Fisheries National Permit System. PII and proprietary BII are collected from fishermen's logbooks. The information is shared within NOAA Fisheries to allow fisherman access to their own data.
- (h) Observer BII data collected at sea is collected from the NOAA Fisheries Pacific Islands Region Office.

5.2 Describe any potential threats to privacy, such as insider threat, as a result of the bureau's/operating unit's use of the information, and controls that the bureau/operating unit has put into place to ensure that the information is handled, retained, and disposed appropriately. (For example: mandatory training for system users regarding appropriate handling of information, automatic purging of information in accordance with the retention schedule, etc.)

To address insider threat and ensure information is handled, retained, and disposed appropriately, users are required to take IT privacy and security awareness and records management training annually.

Other mitigating controls include:

User acknowledgment of policies, procedures and best practices.

Identification and authentication (multifactor, Department of Defense Common Access Card) before accessing PII.

Least privilege network and systems configuration for systems hosting PII/BII.

Access control to PII through access control lists.

Separation of duties involving access to PII.

Enforcement of least privilege.

File system auditing, review, analysis and reporting.

Log aggregation.

Data loss prevention.

Incident response planning, testing and training.

Encryption of removable media, laptops and mobile devices.

Labeling of digital media to secure handling and distribution.

Sanitization of digital and non-digital media containing PII.

Use of encryption to securely transmit PII.

Encryption of data at rest.

Paper records are maintained in secured file cabinets in areas that are accessible only to authorized personnel of NOAA4960.

PII/BII is stored on systems with security configuration checklists applied.

System admins, developers, data users, scientists, administrative assistants and supervisors/managers have access to PII/BII on a need to know basis. Requests to access BII data are handled by a data steward.

Personnel requiring access to BII are required to sign a non-disclosure agreement, at a minimum annually.

Systems transmitting or receiving PII or BII to or from NOAA4960 are required to have an Interconnection Services Agreement.

Section 6: Information Sharing and Access

6.1 Indicate with whom the bureau intends to share the PII/BII in the IT system and how the PII/BII will be shared. (Check all that apply.)

Desiries.	Hov	How Information will be Shared					
Recipient	Case-by-Case	Bulk Transfer	Direct Access				
Within the bureau	X						
DOC bureaus	X						
Federal agencies	X						
State, local, tribal gov't agencies	*X						
Public							
Private sector							
Foreign governments							
Foreign entities							
Other (specify):	**X						

^{*} There is an MOU between NOAA Fisheries and State of Hawaii fisheries to share the data.

^{**}Fishermen have access to their own PII. Information is shared via Kiteworks or hard copy.

The PII/BII in the system will not be shared.

6.2 Does the DOC bureau/operating unit place a limitation on re-dissemination of PII/BII shared with external agencies/entities?

	Yes, the external agency/entity is required to verify with the DOC bureau/operating unit before redissemination of PII/BII.
*X	No, the external agency/entity is not required to verify with the DOC bureau/operating unit before re-
	dissemination of PII/BII.
	No, the bureau/operating unit does not share PII/BII with external agencies/entities.

^{*} Collected PII is only transmitted to the system of records it is meant to reside in.

6.3 Indicate whether the IT system connects with or receives information from any other IT systems authorized to process PII and/or BII.

X Yes, this IT system connects with or receives information from another IT system(s) authorized to process PII and/or BII.

Provide the name of the IT system and describe the technical controls which prevent PII/BII leakage: NOAA4960 interconnects with NOAA0100, NOAA Cyber Security Center, for security event logging and incident response. Aside from username no other PII/BII is shared. All data is encrypted in transit and access granted on a strict need to know basis.

NOAA4960 interconnects for network transit purposes with NOAA1200, NOAA Corporate Services Local Area Network. All data is encrypted in transit and rest.

NOAA4960 interconnects with NOAA4920 to facilitate exchange of fisheries observer and logbook data. All data is encrypted at transit and rest. Least privilege access is granted on a strict need to know basis and a non-disclosure agreement is required.

NOAA4960 utilizes a wide area network link to NOAA4000 to facilitate data interconnection between other systems within the bureau and access to various corporate services. All data is encrypted at rest and in transit.
NOAA4960 interconnects with NOAA4600, accessing bioinformatics applications. All data is encrypted at rest and in transit.
No, this IT system does not connect with or receive information from another IT system(s) authorized to process PII and/or BII.

6.4 Identify the class of users who will have access to the IT system and the PII/BII. (Check all that apply.)

Class of Users				
General Public		Government Employees	X	
Contractors	X			
Other (specify): Fishermen have access to their own PII/BII. Information is shared via Kiteworks or hard copy.				

Section 7: Notice and Consent

7.1 Indicate whether individuals will be notified if their PII/BII is collected, maintained, or disseminated by the system. (Check all that apply.)

X	Yes, notice is provided pursuant to a system of records notice published in the Federal Register and discussed in Section 9.	
X	X Yes, notice is provided by a Privacy Act statement and/or privacy policy. The Privacy Act statement and/or privacy policy can be found at: https://www.fisheries.noaa.gov/privacy-policy	
X	Yes, notice is provided by other means.	Specify how: The PIFSC/NOAA4960 web site does not collect any personal information from website users.
		Notice is given to federal employees and contractors, in writing, by their supervisors. For responses to solicitations, notice is given on the request for information (RFI) or request for proposal (RFP).
		Notice is provided by receipt of the logbooks. There are Pacific Islands Fisheries Science Center logbooks for catching different types of fish and/ or using different gear types. These logbooks are printed by PIFSC and distributed to the vessels.
		State, local, tribal consent is via an MOU between NOAA Fisheries and State of Hawaii fisheries to share date. https://www.ecfr.gov/current/ title-50/section-665.14. Fishermen are obligated to submit their own logbook data.
	No, notice is not provided.	Specify why not:

7.2 Indicate whether and how individuals have an opportunity to decline to provide PII/BII.

X	Yes, individuals have an opportunity to	Specify how:
	decline to provide PII/BII.	Federal employees and contractors may decline to provide
		information in writing to their supervisors, but it may affect their
		job status or their ability to obtain user credentials for the
		NOAA4960 Information System.
		Responses to RFPs/RFIs are voluntary, the offerors may decline
		to provide PII/BII, but that will affect the ability to consider
		their submission.
		Fishermen may decline, by not completing their logbooks, but
		this information is required under the Magnuson-Stevens Act
		and also to maintain their permits.
		Visitors and foreign nationals may decline, but they may be
		denied access to facilities.
	No, individuals do not have an	Specify why not:
	opportunity to decline to provide	
	PII/BII.	

7.3 Indicate whether and how individuals have an opportunity to consent to particular uses of their PII/BII.

X	Yes, individuals have an opportunity to	Specify how:
	consent to particular uses of their	Employees and users accessing the system are provided with the
	PII/BII.	link to NOAA's privacy policy which states: "Submitting
		voluntary information constitutes your consent to the use of the
		information for the stated purpose."
		There is only one use for proposals in response to RFIs or RFPs.
		The only uses for the logbook information are research and
		regulatory. Completion is required by the Magnuson-Stevens
		Act, as explained in the NMFS letter to the fisherman,
		accompanying the permit. Consent to those uses is implied by
		completion of the logbook.
	No, individuals do not have an	Specify why not:
	opportunity to consent to particular uses	
	of their PII/BII.	

7.4 Indicate whether and how individuals have an opportunity to review/update PII/BII pertaining to them.

X	Yes, individuals have an opportunity to review/update PII/BII pertaining to them.	Specify how:
		All federal/contractor user information is maintained within NOAA Enterprise Messaging System (NEMS) database where users can review and update their contact information.
		Offerors will contact the office which issued the solicitation, with updated information.
		Fishermen may contact the PIFSC office and ask to review their own logbook data and request for the information to be updated by the data manager.

	For eLogbook, data remains stored on the tablet and the captains can log into their account to review any submissions. Tablets are furnished by the contractor.
No, individuals do not have an opportunity to review/update PII/BII pertaining to them.	Specify why not:

Section 8: Administrative and Technological Controls

8.1 Indicate the administrative and technological controls for the system. (Check all that apply.)

X	All users signed a confidentiality agreement or non-disclosure agreement.
X	All users are subject to a Code of Conduct that includes the requirement for confidentiality.
X	Staff (employees and contractors) received training on privacy and confidentiality policies and practices.
X	Access to the PII/BII is restricted to authorized personnel only.
	Access to the PII/BII is being monitored, tracked, or recorded.
	Explanation: Repositories containing PII/BII have enhanced auditing features enabled.
17	
X	The information is secured in accordance with the Federal Information Security Modernization Act
	(FISMA) requirements.
	Provide date of most recent Assessment and Authorization (A&A): 8/26/2024
	☐ This is a new system. The A&A date will be provided when the A&A package is approved.
X	The Federal Information Processing Standard (FIPS) 199 security impact category for this system is a
	moderate or higher.
X	NIST Special Publication (SP) 800-122 and NIST SP 800-53 Revision 4 Appendix J recommended
	security controls for protecting PII/BII are in place and functioning as intended; or have an approved Plan of Action and Milestones (POA&M).
X	A security assessment report has been reviewed for the information system and it has been determined
	that there are no additional privacy risks.
X	Contractors that have access to the system are subject to information security provisions in their contracts
	required by DOC policy.
X	Contracts with customers establish DOC ownership rights over data including PII/BII.
	Acceptance of liability for exposure of PII/BII is clearly defined in agreements with customers.
	Other (specify):
	•

8.2 Provide a general description of the technologies used to protect PII/BII on the IT system. (*Include data encryption in transit and/or at rest, if applicable*).

The potential risk of inappropriate disclosure and/or unauthorized disclosure is mitigated by limiting the number of authorized system users, providing initial and annual system security training, monitoring authorized user activity, automatic and immediate notification of unauthorized system access or usage to the system administrator, documenting user violations, and gradually increasing user reprimands for system violations ranging from a verbal warning with refresher security training to denial of system access.

The information is secured via both administrative and technological controls. Data containing sensitive PII/BII are encrypted with FIPS compliant cryptographic algorithms. Users are required to abide by Homeland Security Presidential Directive 12 personal identity verification/multifactor

authentication requirements to access the system. The principle of least privilege and separation of duties is implemented by PIFSC to ensure that personnel with the need to know only have access to this information. The campus has controlled access. The IT spaces have a sub-set on the controlled access.

Access into the data center has an even smaller sub-set of access. Access to the file cabinets has the smallest sub-set of people able to access the systems directly.

All NMFS personnel and contractors are instructed on the confidential nature of this information. Through acknowledgement of the NOAA rules of behavior, account request agreements etc. all users are instructed to abide by all statutory and regulatory data confidentiality requirements, and will only release the data to authorized users.

NOAA4960 connects with NOAA4920, the NOAA Fisheries Pacific Islands Region Office, and NOAA4000, NOAA Fisheries Office of Science and Technology to facilitate exchange of fisheries logbook data. Communications are secured with encrypted VPN tunnels, and transmitted with FIPS-compliant encryption protocols. Access to the system is protected with multifactor authentication. Access control lists restrict access to sensitive and confidential information by IP and user identity on a need-to-know basis.

NOAA4960 connects with NOAA4000 Fisheries wan to facilitate exchange of electronic monitoring data. Buildings employ security systems with locks and access limits. Only those that have the need to know, to carry out the official duties of their job, have access to the data. The computerized data base is password protected, and access is limited. Paper records are maintained in secured file cabinets in areas that are accessible only to authorized personnel of NOAA4960.

Section 9: Privacy Act

an existing SORN).

9.1	Is the I	PII/BII searchable by a personal identifier (e.g.,, name or Social Security number)?
	<u>X</u>	Yes, the PII/BII is searchable by a personal identifier.
		No, the PII/BII is not searchable by a personal identifier.
·		the whether a system of records is being created under the Privacy Act, 5 U.S.C. § (A new system of records notice (SORN) is required if the system is not covered by

As per the Privacy Act of 1974, "the term 'system of records' means a group of any records under the control of any agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual."

Yes, this system is covered by an existing system of records notice (SORN). Provide the SORN name, number, and link. (list all that apply): The following System of Record Notices (SORNs) apply to information collected, used and disseminated: COMMERCE/DEPT-1, Attendance, Leave, and Payroll Records of Employees and Certain Other Persons COMMERCE/DEPT-5, Freedom of Information Act and Privacy Act Request Records COMMERCE/DEPT-6, Visitor Logs and Permits for Facilities Under Department Control COMMERCE/DEPT-9, Travel Records (Domestic and Foreign) of Employees and Certain Other Persons **COMMERCE/DEPT-13**, Investigative and Security Records COMMERCE/DEPT-14, Litigation, Claims, and Administrative Proceeding Records COMMERCE/DEPT-18, Employees Personnel Files Not Covered by Notices of Other Agencies COMMERCE/DEPT-25, Access Control and Identity Management System COMMERCE/DEPT-31, Public Health Emergency Records of Employees, Visitors, and Other Individuals at Department Locations NOAA-5, Fisheries Law Enforcement Case Files NOAA-6. Fishermen's Statistical Data NOAA-19, Permits and Registrations for US Federally Regulated Fisheries OPM/GOVT-1, General Personnel Records OPM/GOVT-2, Employee Performance Info Yes, a SORN has been submitted to the Department for approval on (date). No, this system is not a system of records and a SORN is not applicable.

Section 10: Retention of Information

10.1 Indicate whether these records are covered by an approved records control schedule and monitored for compliance. (Check all that apply.)

X	There is an approved record control schedule. Provide the name of the record control schedule:	
	NOAA Records Schedules:	
	Chapter 100 – General	
	Chapter 200-Adminstrative and Housekeeping Records Chapter 300 - Personnel	
	Chapter 400 – Finance	
	Chapter 500 – Legal	
	Chapter 600– International	
	Chapter 900-Facilities Security and Safety	
	Chapter 1200 – Scientific Research	
	Chapter 1500 – Marine Fisheries	
	The Records Liaison employed in the Office of management and Information is responsible for	
	maintaining the office's Records Management Schedule and for coordinating the records	
	disposition management program for the organization. Each division has records and are	
	responsible for maintaining them.	
	No there is not an approved record control cabadula	
	No, there is not an approved record control schedule. Provide the stage in which the project is in developing and submitting a records control schedule:	
	Provide the stage in which the project is in developing and submitting a records control schedule.	
X	Yes, retention is monitored for compliance to the schedule.	
Λ	No, retention is not monitored for compliance to the schedule. Provide explanation:	
	No, retention is not monitored for compliance to the schedule. Provide explanation:	

10.2 Indicate the disposal method of the PII/BII. (Check all that apply.)

Disposal			
Shredding	X	Overwriting	X
Degaussing	X	Deleting	X
Other (specify): Secure erase technology.			

Section 11: NIST Special Publication 800-122 PII Confidentiality Impact Level

11.1 Indicate the potential impact that could result to the subject individuals and/or the organization if PII were inappropriately accessed, used, or disclosed. (The PII Confidentiality Impact Level is not the same, and does not have to be the same, as the Federal Information Processing Standards (FIPS) 199 security impact category.)

	Low – the loss of confidentiality, integrity, or availability could be expected to have a limited adverse effect on organizational operations, organizational assets, or individuals.
X	Moderate – the loss of confidentiality, integrity, or availability could be expected to have a serious adverse effect on organizational operations, organizational assets, or individuals.
	High – the loss of confidentiality, integrity, or availability could be expected to have a severe or catastrophic adverse effect on organizational operations, organizational assets, or individuals.

11.2 Indicate which factors were used to determine the above PII confidentiality impact level. *(Check all that apply.)*

X	Identifiability	Provide explanation:
		Individuals may be identified with the information stored in the
		system.
X	Quantity of PII	Provide explanation:
		The quantity of records containing sensitive PII consists of Federal employees and contractors. Sensitive PII collected from employees
		are maintained within the information system and a physical copy is stored. BII collected on all PTFSC logbooks, consisting of sales costs and fishing location.
X	Data Field Sensitivity	Provide explanation:
		Sensitive PII is stored, transmitted and immediately deleted. A
		physical copy of each Federal employee's hiring package is stored
		in a secured environment. BII collected on all PTFSC logbooks, consisting of sales costs and fishing location.
X	Context of Use	Provide explanation:
		System accounts, employee emergency notification lists, Fisheries
		Logbooks. No other PII/BII is stored in the information system.
X	Obligation to Protect Confidentiality	Provide explanation:
		The Magnuson-Stevens Fishery Conservation and Management
		Act authorizes confidentiality.
		Privacy Act.
X	Access to and Location of PII	Provide explanation:
		System is not publicly accessible. Fishermen are provided access to

	their PII/BII via email requests with data provided via encrypted
	email or hard copy. PII is stored in areas that can only be accessed
	by authorized personnel with a Common Access Card. The NOAA
	IRC actively maintains access control permissions for authorized
	individuals. PII is stored in a locked storage room in a locked
	drawer. Only support services have access to this room.
Other:	Provide explanation:

Section 12: Analysis

12.1 Identify and evaluate any potential threats to privacy that exist in light of the information collected or the sources from which the information is collected. Also, describe the choices that the bureau/operating unit made with regard to the type or quantity of information collected and the sources providing the information in order to prevent or mitigate threats to privacy. (For example: If a decision was made to collect less data, include a discussion of this decision; if it is necessary to obtain information from sources other than the individual, explain why.)

Insider threat or malware.

To ensure information is handled, retained, and disposed appropriately, users are required to take IT security awareness and records management training annually. Other mitigating controls include: Identification and authentication (multifactor, CAC) before accessing PII

Access control to PII through access control lists

Authorization of users to access BII

Separation of duties involving access to PII

Enforcement of least privilege

System log auditing, review, analysis and reporting

Encryption of removable media, laptops and mobile devices

Labeling of digital media to secure handling and distribution

Sanitization of digital and non-digital media containing PII

Use of encryption to securely transmit PII

Encryption of data at rest

Commercial Off the Shelf Software backup and disaster recovery solutions.

Paper records maintained in secured file cabinets in areas that are accessible only to authorized personnel of NOAA4960.

12.2 Indicate whether the conduct of this PIA results in any required business process changes.

	Yes, the conduct of this PIA results in required business process changes. Explanation:
v	No the conduct of this DIA does not recult in any required business makes about of
Λ	No, the conduct of this PIA does not result in any required business process changes.

12.3	Indicate	whether	the conduct	of this	s PIA	results	in any	required	technology	changes.
1	marcace	**********	tile collane.	OI CIII	, , ,, ,	LODGIES	III ciii	1 Cq all Ca	COULTION	oliali pos.

	Yes, the conduct of this PIA results in required technology changes. Explanation:
X	No, the conduct of this PIA does not result in any required technology changes.
