# U.S. Department of Commerce Privacy Impact Assessment USPTO Reed Tech PDDM

Unique Project Identifier: PTOC-065-00

**Introduction: System Description** 

Provide a brief description of the information system.

The Reed Tech Patent Data and Document Management (Reed Tech PDDM) system is designed to process, transmit and store data and images to support the data-capture and conversion requirements of the USPTO patent application process. Patent applications are typically submitted to USPTO on paper (hard copy) or in electronic format. Under the PDDM contract, Reed Tech hosts and manages the PDDM system and is required to convert the paper applications into an electronic format, including all text, graphics, artwork, drawings, etc. Once converted to electronic data, each patent is composed and formatted to USPTO specifications for delivery back to USPTO.

The Reed Tech Published Application A lert Service (PAAS) is a service offered by the USPTO to allow the public to configure queries and alerts for key words in pre-grant published patent applications. A logged-in user creates a keyword search, which will be executed on a weekly basis against only the most recent pre-grant published patent applications. The queries will be executed at the date and time of the publication of the data by the USPTO. The data that will be used for searching will be copied out of the Reed Tech Patent Data Capture (PDCap) main system (which is being retired) onto a file system on or attached to the backend server. The queries will be run against the data on that file share and not within the main PDCap file system. After the queries are executed, the data for that week's pre-grant published patent applications will be deleted from the file system on or attached to the backend server. After the queries are executed, an email alert will be sent to the user's email address, which will be part of the profile created during registration. Queries against patent applications older than the most recent publication date will not be possible, as prior publication data is removed from the system after the weekly search is executed. Other features of the system will include the functionality to allow a logged-in user to view the queries that have been created under their user name, and the ability for a user to test

their queries against static data.

Address the following elements:

- (a) Whether it is a general support system, major application, or other type of system Reed Tech PDDM is a major application.
- (b) System location

The system is located in Horsham, Pennsylvania and has several satellite locations.

(c) Whether it is a standalone system or interconnects with other systems (identifying and describing any other systems to which it interconnects)

Reed Tech PDDM is not a standalone system. There is a point-to-point Digital Signal Level 3 (DS3) that provides connectivity between Horsham, Pennsylvania, and USPTO at Alexandria, Virginia. It interconnects with the systems below:

• Contractor Access System (CAS): CAS is an infrastructure information system that provides off-site contractors and selected USPTO employees with limited, monitored,

and secured access to PTONet applications, resources, and services. The CAS network provides contractors with access to the USPTO network (PTONet) through the Enterprise Trusted User (ETU) Firewall architecture.

- Network and Security Infrastructure (NSI): The NSI facilitates the communications, secure access, protective services, and network infrastructure support for all USPTO applications.
- Patent Capture Application Processing System Examination Support (PCAPS-ES):
   The purpose of PCAPS-ES is to process, transmit and store data and images to support the data-capture and conversion requirements of the USPTO to support the USPTO patent application process.
- (d) The way the system operates to achieve the purpose(s) identified in Section 4
  PDDM operates as follows: When both hardcopy and electronic patent applications are initially received at the USPTO, the documents are scanned/uploaded respectively into the Image File Wrapper (IFW) system which falls under PCAPS-ES. Applications are electronically exported to the Reed Tech PDDM system via a USPTO-managed interconnection.

PAAS operates as follows: After a logged-in user creates a keyword search, it will be executed on a weekly basis against only the most recent pre-grant published patent applications.

(e) How information in the system is retrieved by the user

PDDM - Information in the system is retrieved by the user after the patent applications are electronically exported to the Reed Tech PDDM system via a USPTO-managed interconnection.

PAAS – Information in the system is retrieved by the user via a web interface after a logged-in user creates a keyword search, which will be executed on a weekly basis against only the most recent pre-grant published patent application.

(f) How information is transmitted to and from the system

PDDM - Patent applications and application contents are sent to and from the PDDM system via Secured File Transfer Protocol (SFTP).

PAAS - After a logged-in user creates a keyword search, it is executed on a weekly basis against only the most recent pre-grant published patent applications. The queries are executed at the date and time of the publication of the data by the USPTO.

#### (g) Any information sharing

Information within PDDM system is shared with PTO employees, members of the public, PTO contractors and subcontractors who work for Reed Tech. Subcontractors are contractually

prohibited from sharing information provided to them as part of the PDDM contract. For all subcontractors, encrypted information is transferred to them via secure connections.

- (h) The specific programmatic authorities (statutes or Executive Orders) for collecting, maintaining, using, and disseminating the information 35 U.S.C. 2 and 115, Leahy-Smith America Invents Act, E-Government Act, and Open Government Data Act are the applicable programmatic authorities.
- (i) The Federal Information Processing Standards (FIPS) 199 security impact category for the system Moderate.

#### **Section 5: Use of the Information**

5.1 In the context of functional areas (business processes, missions, operations, etc.) supported by the IT system, describe how the PII/BII that is collected, maintained, or disseminated will be used. Indicate if the PII/BII identified in Section 2.1 of this document is in reference to a federal employee/contractor, member of the public, foreign national, visitor or other (specify).

Reed Tech PDDM: PII/BII is collected and maintained in this system to facilitate the processing of patent applications for administrative matters, to improve federal online services, to promote information sharing initiatives, and customer satisfaction. The PII/BII comes from persons applying for patents through the USPTO.

5.2 Describe any potential threats to privacy, such as insider threat, as a result of the bureau's/operating unit's use of the information, and controls that the bureau/operating unit has put into place to ensure that the information is handled, retained, and disposed appropriately. (For example: mandatory training for system users regarding appropriate handling of information, automatic purging of information in accordance with the retention schedule, etc.)

In the event of computer failure, insider threats, or attack against the system by adversarial or foreign entities, any potential PII/BII data Reed Tech PDDM stored within the system could be exposed. In an effort to avoid a breach, Reed Tech PDDM has put certain security controls in place to ensure that information is handled, retained, and disposed of appropriately. Access to individual's PII is controlled through the application and all personnel who access the data must first authenticate to the system at which time an audit trail is generated when the database is accessed. These audit trails are based on application server out-of-the-box logging reports reviewed by the Information System Security Officer and System Auditor and any suspicious indicators such as browsing will be immediately investigated and appropriate action taken. Also, system users undergo annual mandatory training regarding appropriate handing of information.

#### Section 6: Information Sharing and Access

6.1 Indicate with whom the bureau intends to share the PII/BII in the IT system and how the

### PII/BII will be shared. (Check all that apply.)

Recipient		Но	w Information will be S	Shared	
	Case-b	y-Case	Bulk Transfer	Direct Acce	ess
Within the bureau			$\boxtimes$		
DOC bureaus					
Federalagencies					
State, local, tribal gov't agencies					
Public	Σ				
Private sector					
Foreign governments					
Foreign entities					
Other(specify):					
	Does the DOC bureau/operating unit place a limitation on re-dissemination of PII/BII shared with external agencies/entities?				
<ul> <li>Yes, the external agency/entity is required to verify with the DOC bureau/operating unit before redissemination of PII/BII.</li> <li>No, the external agency/entity is not required to verify with the DOC bureau/operating unit before redissemination of PII/BII.</li> <li>No, the bureau/operating unit does not share PII/BII with external agencies/entities.</li> </ul>					
Indicate whether the IT system connects with or receives information from any other IT systems authorized to process PII and/or BII.					
Yes, this IT system connects with or receives information from another IT system(s) authorized to process PII and/or BII.  No, this IT system does not connect with or receive information from another IT system(s) authorized to					
process PII and/or BII.	process PII and/or BII.				
6.4 Identify the class of users who wil all that apply.)	ll have aco	cess to the	e IT system and the	PII/BII. (Che	eck
Class of Users General Public		Governm	ent Employees		
Contractors		GOVCIIII	ъпт Епрюуссь		$\boxtimes$
Other(specify):					

#### **Section 7:** Notice and Consent

7.1	Indicate whether individuals	will be notified if their PII/BII is collected, maintained, or
	disseminated by the system.	(Check all that apply.)

$\boxtimes$	Yes, notice is provided pursuant to a system of records notice published in the Federal Register and discussed in Section 9.				
	Yes, notice is provided by a Privacy Act statement and/or privacy policy.  The Privacy Act statement and/or privacy policy can be found at: <a href="https://www.uspatentappalerts.com">https://www.uspatentappalerts.com</a> .				
$\boxtimes$	Yes, notice is provided by other means.	Specify how: See Appendix A for example of warning banner.			
	No, notice is not provided.	Specify why not:			

7.2 Indicate whether and how individuals have an opportunity to decline to provide PII/BII.

Yes, individuals have an opportunity to decline to provide PII/BII.	Specify how:
No, individuals do not have an opportunity to decline to provide PII/BII.	Specify why not: Applicants could only decline to provide PII/BII by declining to continue with the application process. Patent applicants are informed that their PII/BII information will become public as part of the patent process. This notification is provided to the patent applicant by the USPTO upon filing/submission of patent application via the front-end system

7.3 Indicate whether and how individuals have an opportunity to consent to particular uses of their PII/BII.

$\boxtimes$	Yes, individuals have an opportunity to	Specify how:
	consentto particular uses of their PII/BII.	Patent applicants are informed that their PII/BII information will become public as part of the patent process. The applicants have the opportunity to consent to the uses of their PII/BII by accepting to go through with the application process via the front-end system.
	No, individuals do not have an opportunity to consent to particular uses of their PII/BII.	Specify why not:

7.4 Indicate whether and how individuals have an opportunity to review/update PII/BII pertaining to them.

$\boxtimes$	Yes, individuals have an opportunity to	Specify how:
	review/update PII/BII pertaining to	Patent applicants may update their PII/BII at any time by filing
	them.	the appropriate forms with the USPTO. The USPTO, in turn,
		forwards the updated information to Reed Tech as part of

	standard business processes and the updated PII/BII information would be reflected in the next deliverable to the USPTO.
No, individuals do not have an opportunity to review/update PII/BII pertaining to them.	Specify why not:

#### **Section 8:** Administrative and Technological Controls

8.1	Indicate the administrative	and technological	controls	for the system.	(Check all that
	apply.)				

	All users signed a confidentiality agreement or non-disclosure agreement.
	All users are subject to a Code of Conduct that includes the requirement for confidentiality.
$\boxtimes$	Staff (employees and contractors) received training on privacy and confidentiality policies and practices.
	Access to the PII/BII is restricted to authorized personnel only.
$\boxtimes$	Access to the PII/BII is being monitored, tracked, or recorded.  Explanation: Reed Tech monitors, tracks, and records access to the PII/BII through an automated logging solution.
$\boxtimes$	The information is secured in accordance with the Federal Information Security Modernization Act (FISMA) requirements.  Provide date of most recent Assessment and Authorization (A&A):  This is a new system. The A&A date will be provided when the A&A package is approved.
$\boxtimes$	The Federal Information Processing Standard (FIPS) 199 security impact category for this system is a moderate or higher.
$\boxtimes$	NIST Special Publication (SP) 800-122 and NIST SP 800-53 Revision 4 Appendix J recommended security controls for protecting PII/BII are in place and functioning as intended; or have an approved Plan of Action and Milestones (POA&M).
$\boxtimes$	A security assessment report has been reviewed for the information system and it has been determined that there are no additional privacy risks.
$\boxtimes$	Contractors that have access to the systemare subject to information security provisions in their contracts required by DOC policy.
	Contracts with customers establish DOC owners hip rights over data including PII/BII.
	Acceptance of liability for exposure of PII/BII is clearly defined in agreements with customers.
	Other(specify):

8.2 Provide a general description of the technologies used to protect PII/BII on the IT system. (Include data encryption in transit and/or at rest, if applicable).

PII within Reed Tech PDDM is secured using appropriate management, operational, and technical safeguards in accordance with NIST requirements. Such management controls include the life cycle review process to ensure that management controls are in place and documented in the System Security Privacy Plan (SSPP). The SSPP specifically addresses the management, operational, and technical controls that are in place and planned during the operation of the system. Operational safeguards include restricting access to PII/BII data to a small subset of Reed Tech PDDM users. All access has role-based restrictions and individuals with access privileges have undergone vetting and suitability screening. Data is maintained in areas accessible only to authorize personnel. Reed Tech PDDM maintains an audit trail and the appropriate personnel is alerted when there is suspicious activity. Data is encrypted in transit and at rest.

<u>Secti</u>	i <u>on 9</u> : Pi	rivacy Act
9.1	Is the P	II/BII searchable by a personal identifier (e.g, name or Social Security number)?
	$\boxtimes$	Yes, the PII/BII is searchable by a personal identifier.
		No, the PII/BII is not searchable by a personal identifier.
9.2	§ 552a. by an e. As per the	whether a system of records is being created under the Privacy Act, 5 U.S.C. (A new system of records notice (SORN) is required if the system is not covered xisting SORN).  Privacy Act of 1974, "the term 'system of records' means a group of any records under the control of any agency from which is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned ridual."
$\boxtimes$		is system is covered by an existing system of records notice (SORN). e the SORN name, number, and link. (list all that apply):
	PDDM COMN	MERCE/PAT-TM-7 Patent Application Files covers the patent application records residing in MERCE/PAT-TM-10 Deposit Accounts and Electronic Funds Transfer Profiles MERCE/PAT-TM-12, Patent Subscription Service System

#### **Section 10:** Retention of Information

10.1 Indicate whether these records are covered by an approved records control schedule and monitored for compliance. (Check all that apply.)

Yes, a SORN has been submitted to the Department for approval on <u>(date)</u>. No, this system is not a system of records and a SORN is not applicable.

$\boxtimes$	There is an approved record control schedule. Provide the name of the record control schedule:	
	GRS 5.1, item 020: Non-Recordkeeping Copies of Electronic Records	
	N1-241-10-1:4.4, Patent Administrative Feeder Records	
	• GRS 6.5, item 010: Customer/Client Records	
	No, there is not an approved record control schedule.  Provide the stage in which the project is in developing and submitting a records control schedule:	
$\boxtimes$	Yes, retention is monitored for compliance to the schedule.	
	No, retention is not monitored for compliance to the schedule. Provide explanation:	

10.2 Indicate the disposal method of the PII/BII. (Check all that apply.)

Dis pos al			
Shredding	$\boxtimes$	Overwriting	$\boxtimes$
Degaussing	$\boxtimes$	Deleting	$\boxtimes$
Other(specify):			

#### Section 11: NIST Special Publication 800-122 PII Confidentiality Impact Level

11.1 Indicate the potential impact that could result to the subject individuals and/or the organization if PII were inappropriately accessed, used, or disclosed. (The PII Confidentiality Impact Level is not the same, and does not have to be the same, as the Federal Information Processing Standards (FIPS) 199 security impact category.)

	Low – the loss of confidentiality, integrity, or availability could be expected to have a limited adverse
	effect on organizational operations, organizational assets, or individuals.
$\boxtimes$	Moderate – the loss of confidentiality, integrity, or availability could be expected to have a serious
	adverse effect on organizational operations, organizational assets, or individuals.
	High – the loss of confidentiality, integrity, or availability could be expected to have a severe or
	catastrophic adverse effect on organizational operations, organizational assets, or individuals.

11.2 Indicate which factors were used to determine the above PII confidentiality impact level. (Check all that apply.)

	Identifiability	Provide explanation: The Reed Tech PDDM system contains PII/BII data that is individually traceable. The combination of name, occupation and other identifiers can easily identify a particular individual.
$\boxtimes$	Quantity of PII	Provide explanation: These number may vary based on how many applications are received but is in the thousands.
	Data Field Sensitivity	Provide explanation: The Reed Tech PDDM system contains PII/BII data that is individually traceable. The combination of the data in the fields identified in section 2.1 could together make the data fields more sensitive.
$\boxtimes$	Context of Use	Provide explanation: The Reed Tech PDDM system PII/BII is used as part of the patent application process.
	Obligation to Protect Confidentiality	Provide explanation: Reed Tech is contractually obligated to protect the confidentiality of the data. This system is governed by The Privacy Act

		of 1974, which prohibits the disclosure of information from a system of records absents of the written consent of the subject individual unless a statutory exception applies.
	Access to and Location of PII	Provide explanation: The PII/BII data collected by the USPTO is transferred to Reed Tech. While it is at Reed Tech, which is a secured site and the data is accessible by individuals not directly employed by the USPTO.
	Other:	Provide explanation:
Sectio	n 12: Analysis	
12.1 Identify and evaluate any potential threats to privacy that exist in light of the information collected or the sources from which the information is collected. Also, describe the choices that the bureau/operating unit made with regard to the type or quantity of information collected and the sources providing the information in order to prevent or mitigate threats to privacy. (For example: If a decision was made to collect less data, include a discussion of this decision; if it is necessary to obtain information from sources other than the individual, explain why.)		
System users undergo annual mandatory training regarding appropriate handling of information. Physical access to servers is restricted to only a few authorized individuals. The servers storing the potential PII are located in a highly sensitive zones within the cloud and logical access is segregated with network firewalls and switches through an Access Control list that limits access to only a few approved and authorized account. USPTO monitors, in real-time, all activities and events within the servers storing the potential PII data and personnel review audit logs received on a regular bases and alert the appropriate personnel when inappropriate or unusual activity is identified.		
12.2 Indicate whether the conduct of this PIA results in any required business process changes.		
Yes, the conduct of this PIA results in required business process changes.  Explanation:		
No, the conduct of this PIA does not result in any required business process changes.		
12.3 Indicate whether the conduct of this PIA results in any required technology changes.		
Yes, the conduct of this PIA results in required technology changes. Explanation:		
No, the conduct of this PIA does not result in any required technology changes.
