# U.S. Department of Commerce U.S. Census Bureau

Privacy Threshold Analysis for the CEN 16 Network Services

### **U.S. Department of Commerce Privacy Threshold Analysis**

#### U.S. Census Bureau CEN16 Network Services

**Unique Project Identifier: [Number]** 

**Introduction:** This Privacy Threshold Analysis (PTA) is a questionnaire to assist with determining if a Privacy Impact Assessment (PIA) is necessary for this IT system. This PTA is primarily based from the Office of Management and Budget (OMB) privacy guidance and the Department of Commerce (DOC) IT security/privacy policy. If questions arise or further guidance is needed in order to complete this PTA, please contact your Bureau Chief Privacy Officer (BCPO).

**Description of the information system and its purpose:** Provide a general description (in a way that a non-technical person can understand) of the information system that addresses the following elements:

The E-Government Act of 2002 defines "information system" by reference to the definition section of Title 44 of the United States Code. The following is a summary of the definition: "Information system" means a discrete set of information resources organized for the collection, processing, maintenance, use, sharing, dissemination, or disposition of information. See: 44. U.S.C. § 3502(8).

CEN16 Network Services consists of servers that are primarily managed by the Computer Services Division (CSvD). A server is a computer or operating system that provides resources, data, services, or programs to other computers, known as clients, over a network. CEN16supports the Census Bureau's mission to collect United States (U.S.) statistical data. CSvD's mission is to provide the Census Bureau and other customers with a world-class computer center using "best practices" and state-of-the-art technology to monitor systems, communications, and applications.

CEN16 Network Services hosts Census Bureau IT systems that may use, store, and maintain PII/BII received from the public through surveys, censuses, or from other IT systems that use, store and maintain other PII including personnel data, etc. Access to this data is only accessible by CEN16 server administrators. CEN16 does not perform dissemination of information; the IT systems hosted on CEN16 servers perform information dissemination.

- (a) Whether it is a general support system, major application, or other type of system General Support System
- (b) System location

The CEN16 servers are located at the U.S. Census Bureau's Bowie Computer Center (BCC), Headquarters, and the Regional Offices.

(c) Whether it is a standalone system or interconnects with other systems (identifying and describing any other systems to which it interconnects)

CEN16 connects with and hosts all Census Bureau IT systems that store and maintain information. Authentication information is received from CEN01 Data Communications.

(d) The purpose that the system is designed to serve CEN16 is designed to serve two purposes:

- For Administrative Matters; Authentication information is received from CEN01 for Census Bureau employees and contractors for authentication purposes. This is used to provide access to the servers.
- Other; PII/BII received from other IT systems covered by other CEN plans is maintained on CEN16 server infrastructure for Storage Area Network (SAN) storage; data is not disseminated. This data refers to all PII/BII maintained by other Census Bureau information systems including data received from the public through surveys, federal employees, contractors, foreign nationals, and visitors.
- (e) The way the system operates to achieve the purpose CEN16 Network Services consists of servers that are primarily managed by the Computer Services Division (CSvD). The servers operate by hosting IT systems covered by other CEN plans. The PII/BII is maintained on CEN16 server infrastructure for Storage Area Network (SAN) storage; data is not disseminated.
- (f) A general description of the type of information collected, maintained, use, or disseminated by the system

CEN16 Network Services hosts Census Bureau IT systems that may use, store, and maintain PII/BII received from the public through surveys, censuses, or from other IT systems that use, store and maintain other PII including personnel data, etc.

- (g) Identify individuals who have access to information on the system U.S. Census Bureau employees and contractors have access to CEN16.
- (h) How information in the system is retrieved by the user Information is not retrieved at the server level by personal identifier, but may be retrieved by the hosted IT systems. Therefore, CEN16 is not a Privacy Act system of records.

The information retrieved from IT systems containing PII/BII that are hosted on the CEN16 servers are governed by the system of record notice(s) (SORN(s)) specific to the record types stored within the IT system and must be used in accordance with the purpose(s) identified in the SORN.

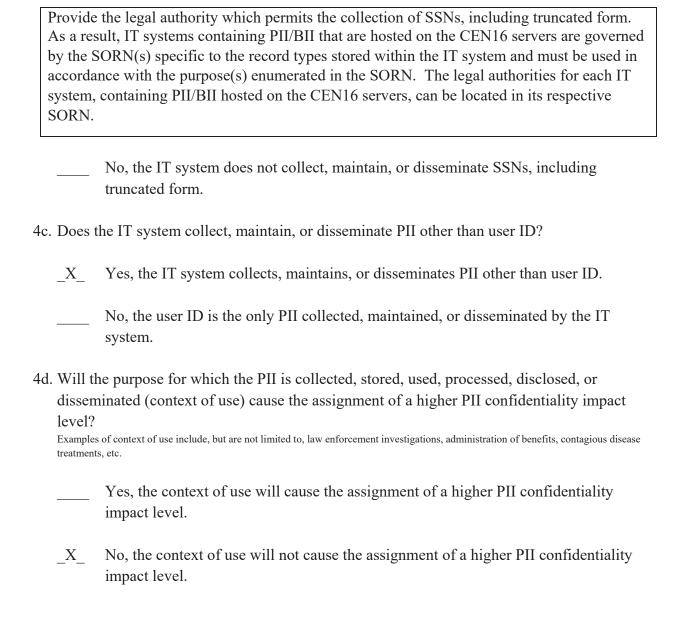

(i) How information is transmitted to and from the system
No PII/BII is transmitted by the CEN16 servers or operating system; only the IT systems hosted on the servers transmit information.

### Questionnaire:

2.

	This is a new information system. Continue to answer questions and complete certification.					
		isting information system with changes that create new privacy risks.  ow, continue to answer questions, and complete certification.				
	Changes That Create New Privacy Risks (CTCNPR)

3.	Does the IT system collect, maintain, or disseminate business identifiable information (BII)? As per DOC Privacy Policy: "For the purpose of this policy, business identifiable information consists of (a) information that is defined in the Freedom of Information Act (FOIA) as "trade secrets and commercial or financial information obtained from a person [that is] privileged or confidential." (5 U.S.C.552(b)(4)). This information is exempt from automatic release under the (b)(4) FOIA exemption. "Commercial" is not confined to records that reveal basic commercial operations" but includes any records [or information] in which the submitter has a commercial interest" and can include information submitted by a nonprofit entity, or (b) commercial or other information that, although it may not be exempt from release under FOIA, is exempt from disclosure by law (e.g., 13 U.S.C.)."			
	_X_ Yes, the IT system collects, maintains, or disseminates BII.			
	No, this IT system does not collect any BII.			
	Personally Identifiable Information (PII)  Does the IT system collect, maintain, or disseminate PII?  As per OMB 17-12: "The term PII refers to information that can be used to distinguish or trace an individual's identity either alone or when combined with other information that is linked or linkable to a specific individual."			
	_X_ Yes, the IT system collects, maintains, or disseminates PII about: (Check all that apply.)			
	_X DOC employees National Institute of Standards and Technology Associates _X Contractors working on behalf of DOC _X Other Federal Government personnel _X Members of the public			
	No, this IT system does not collect any PII.			
If i	the answer is "yes" to question 4a, please respond to the following questions.			
4b	b. Does the IT system collect, maintain, or disseminate Social Security numbers (SSNs), including truncated form?			
	_X Yes, the IT system collects, maintains, or disseminates SSNs, including truncated form.			
	Provide an explanation for the business need requiring the collection of SSNs, including truncated form.			
	SSN could reside within IT systems, residing on CEN16 server infrastructure. Other PIAs for IT systems hosted on CEN16 servers will contain SSN justifications, as applicable.			

If any of the answers to questions 2, 3, 4b, 4c, and/or 4d are "Yes," a Privacy Impact Assessment (PIA) must be completed for the IT system. This PTA and the approved PIA must be a part of the IT system's Assessment and Authorization Package.
