U.S. Department of Commerce Privacy Impact Assessment NOAA/NWS/NTWS

Unique Project Identifier: NOAA8865

Introduction: System Description

Provide a brief description of the information system.

The NOAA Tsunami Warning System (NTWS) provides tsunami alert information to the US and other countries in the Pacific Ocean, Atlantic Ocean and Caribbean Sea. The NTWS is composed of two Tsunami Warning Centers: the National Tsunami Warning Center (NTWC) in Palmer, Alaska and the Pacific Tsunami Warning Center (PTWC) in Pearl Harbor, Hawaii.

These Centers have a widespread client base: emergency managers, the scientific community, and the public. They are responsible for gathering information from observational systems; detecting potential tsunami-generating events; processing and analyzing the events to determine tsunami danger; developing decision support information for operational and scientific decision makers; and disseminating warning and notification products to the public and other entities.

Address the following elements:

(a) Whether it is a general support system, major application, or other type of system

The NOAA Tsunami Warning System (NTWS) is a general support system that acts to evaluate seismic data and determine possible tsunami hazards. The system then notifies parties responsible for emergency management.

(b) System location

The system is split between two centers: one at the Inouye Regional Center in Pearl Harbor, Hawaii (Pacific Tsunami Warning Center) and one in Palmer, Alaska (National Tsunami Warning Center).

(c) Whether it is a standalone system or interconnects with other systems (identifying and describing any other systems to which it interconnects)

This is not a standalone system. There is a connection with ISC International, which stores information on a password protected account. ISC International is based in Milwaukee WI. ISC also stores information for the Pacific Tsunami Warning Center (PTWC), based on a list from the Intergovernmental Oceanographic Commission. Both centers contract with ISC for dissemination of warnings and outages. This system is supported via the National Centers for Environmental Prediction (NCEP) for its routing/firewall which is part of the Weather and Climate Computing Infrastructure Services (NOAA8860 – WCCIS), The National Data Buoy Center (NOAA8873 – NDBC) as well as Alaska Region Headquarters (NOAA8880). The system also interconnects

with the Advanced Weather Interactive Processing System (NOAA8107 – AWIPS) for development on a potential system replacement.

(d) The way the system operates to achieve the purpose(s) identified in Section 4

The system collects seismic data from international and domestic partners for evaluating events and warning messages are disseminated through email, phone, fax, Emergency Managers Weather Information Network (EMWIN), social media, and the web. Data collected helps improve the Federal Service by notifying emergency managers about tsunami threats or troubleshooting data outages with seismic data providers. In the case of any legal action, this information may be subpoenaed and made available if legally required to do so. Employee information is stored by the respective center's directors.

(e) How information in the system is retrieved by the user

Contact information lists used for tsunami warnings and alerts are maintained on the ISC International servers and protected via username and password accessible via the Internet by both of the tsunami centers. These lists are also accessible over the Internet accessible by Application Programming Interface (API). API access requires authentication and is configured such that automated tsunami alerts can be sent to emergency managers and other personnel on the ISC International lists. Local copies are also retained.

An employee call-down list is provided on paper in the access-controlled operations room under a privacy sheet telling employees their privacy rights.

(f) How information is transmitted to and from the system

Contact information is provided by the individual in a voluntary manner via the United Nations Education, Science, and Cultural Organization (UNESCO) via an encrypted HTTPS session and is added via an HTTPS web interface to ISC International. This information is used in order to facilitate communication in either the event of a warning, communication about data changes or outages, and/or tests. A Privacy Act Statement is available on the Web site and to the reply email. A list of employee home phone numbers is also contained in the access-controlled room as a 'phone down' list in case they need to be called in for work or an emergency.

(g) Any information sharing

Information received from UNESCO is organized and put into a contact list that Federal employees maintain on the ISC International system. This list is then used by the centers to issue email and fax alerts to those recipients. These contact lists remain with ISC International and aren't shared within NOAA, other DOC bureaus, or other federal agencies or offices.

System administration audit data is shared with NOAA0100 (NOAA Cybersecurity Center) for computer security incident response purposes

- (h) The specific programmatic authorities (statutes or Executive Orders) for collecting, maintaining, using, and disseminating the information
 - 5 U.S.C. § 301 authorizes the operations of an executive agency, including the creation, custodianship, maintenance and distribution of records.
 - 44 U.S.C. § 3101 addresses records management by Department agency heads.
 - 15 U.S.C. § 1512 is an Organic Law which confers general powers and duties authority to executive agencies, vesting jurisdiction and control of departments, bureaus, offices and branches
 - Executive Orders 10450, 11478, 12564, 12656, 13164
 - 5 U.S.C. 301 and 7531–332, 15 U.S.C. 1501 et seq., 28 U.S.C. 533–535, 41 U.S.C. 433(d), 5 U.S.C. 5379
 - 5 CFR Part 537, DAO 202-957, Federal Preparedness Circular (FPC) 65, July 26, 1999, Equal Employment Act of 1972, Public Law 100-71, dated July 11, 1987
- (i) The Federal Information Processing Standards (FIPS) 199 security impact category for the system

NOAA8865 is designated as a FIPS 199 High-impact information system.

Section 1: Status of the Information System

1.1 Indicate whether the information	ation system is a new or exist	ting system.	
This is a new information	•		
<u> </u>	nation system with changes t	that create new privacy risks.	
(Check all that apply.)			
Changes That Create New Privacy Ri	sks (CTCNPR)		
a. Conversions	d. Significant Merging	g. New Interagency Uses	
b. Anonymous to Non- Anonymous	e. New Public Access	h. Internal Flow or Collection	
c. Significant System	f. Commercial Sources	i. Alteration in Character	
Management Changes		of Data	
j. Other changes that create new privacy	risks (specify):		
<u> </u>	nation system in which chan SAOP approved Privacy Imp	ges do not create new privacy act Assessment.	
	nation system in which chan P approved Privacy Impact	ges do not create new privacy Assessment.	

Section 2: Information in the System

Indicate what personally identifiable information (PII)/business identifiable information 2.1 (BII) is collected, maintained, or disseminated. (Check all that apply.)

Identifying Numbers (IN)			
a. Social Security*	f. Driver's License	j. Financial Account	
b. Taxpayer ID	g. Passport	k. Financial Transaction	
c. Employer ID	h. Alien Registration	Vehicle Identifier	
d. Employee ID	i. Credit Card	m. Medical Record	
e. File/Case ID			
n. Other identifying numbers (specify):			

^{*}Explanation for the business need to collect, maintain, or disseminate the Social Security number, including truncated form:

General Personal Data (GP	D)				
a. Name	X	h.	Date of Birth		o. Financial Information
b. Maiden Name		i.	Place of Birth		p. Medical Information
c. Alias		j.	Home Address		q. Military Service
d. Gender		k.	Telephone Number	X	r. Criminal Record
e. Age		1.	Email Address	X	s. Marital Status
f. Race/Ethnicity		m.	Education		t. Mother's Maiden Name

g. Citizenship	n.	Religion		
u. Other general personal data	(specify):			

Work-Related Data (WRD)				
a. Occupation		e. Work Email Address	X	i. Business Associates
b. Job Title		f. Salary		j. Proprietary or Business Information
c. Work Address		g. Work History		k. Procurement/contracting records
d. Work Telephone Number	X	h. Employment Performance Ratings or other Performance Information		
l. Other work-related data	(specify):		

Distinguishing Features/Biometrics (DFB)				
a. Fingerprints	f. Scars, Marks, Tattoos	k. Signatures		
b. Palm Prints	g. Hair Color	l. Vascular Scans		
c. Voice/Audio Recording	h. Eye Color	m. DNA Sample or Profile		
d. Video Recording	i. Height	n. Retina/Iris Scans		
e. Photographs	j. Weight	o. Dental Profile		
p. Other distinguishing features/	biometrics (specify):	·		

System Administration/Audit Data (SAAD)					
a. User ID	X	c. Date/Time of Access	X	e. ID Files Accessed	X
b. IP Address	X	d. Queries Run	X	f. Contents of Files	X
g. Other system administration/audit data (specify):					

Other Information (specify)		

2.2 Indicate sources of the PII/BII in the system. (Check all that apply.)

Directly from Individual about Whom the Information Pertains					
In Person	X	Hard Copy: Mail/Fax	X	Online	
Telephone		Email	X		
Other (specify):					

Government Sources			
Within the Bureau	Other DOC Bureaus	Other Federal Agencies	
State, Local, Tribal	Foreign		

Other (specify):				
Non-government Sources				
Public Organizations	X	Private Sector	Commercial Data Brokers	
Third Party Website or Application	ation	•		
Other (specify):				

2.3 Describe how the accuracy of the information in the system is ensured.

Contact information is provided by those requesting information. Occasional test messages are issued, at which time invalid data may become known from email bounce backs to disconnected phone messages. This information is investigated to determine if incorrect data was mistakenly given, in which case correct information is requested or in the case of points of contact changing, older records are removed and replaced with new points of contacts.

2.4 Is the information covered by the Paperwork Reduction Act?

	Yes, the information is covered by the Paperwork Reduction Act. Provide the OMB control number and the agency number for the collection.
X	No, the information is not covered by the Paperwork Reduction Act.

2.5 Indicate the technologies used that contain PII/BII in ways that have not been previously deployed. (Check all that apply.)

Technologies Used Containing PII/BII Not Previously Deployed (TUCPBNPD)			
Smart Cards	Biometrics		
Caller-ID	Personal Identity Verification (PIV) Cards		
Other (specify):			

X	There are not any technologies used that contain PII/BII in ways that have not been previously deployed	<u>1.</u>

Section 3: System Supported Activities

3.1 Indicate IT system supported activities which raise privacy risks/concerns. (Check all that apply.)

Activities		

Audio recordings	Building entry readers				
Video surveillance	Electronic purchase transactions				
Other (specify):					
There are not any IT system supported activities which raise privacy risks/concerns.					

Section 4: Purpose of the System

4.1 Indicate why the PII/BII in the IT system is being collected, maintained, or disseminated. (*Check all that apply.*)

For a Computer Matching Program		For administering human resources programs	
For administrative matters	X	To promote information sharing initiatives	X
For litigation		For criminal law enforcement activities	
For civil enforcement activities		For intelligence activities	
To improve Federal services online	X	For employee or customer satisfaction	
For web measurement and customization	X	For web measurement and customization	
technologies (single-session)		technologies (multi-session)	

Section 5: Use of the Information

5.1 In the context of functional areas (business processes, missions, operations, etc.) supported by the IT system, describe how the PII/BII that is collected, maintained, or disseminated will be used. Indicate if the PII/BII identified in Section 2.1 of this document is in reference to a federal employee/contractor, member of the public, foreign national, visitor or other (specify).

Contact information is stored in a contact list on the information system, printed out for hard copy look ups stored in an access-controlled operations room and is stored in mailing and fax lists maintained by ISC International whose system provides confidentiality, integrity, and availability controls (members of the public).

5.2 Describe any potential threats to privacy, such as insider threat, as a result of the bureau's/operating unit's use of the information, and controls that the bureau/operating unit has put into place to ensure that the information is handled, retained, and disposed appropriately. (For example: mandatory training for

system users regarding appropriate handling of information, automatic purging of information in accordance with the retention schedule, etc.)

Contact information may become stale in which case phone numbers no longer working or email bounce backs are checked and records are updated as necessary. All employees complete NOAA's record retention training and IT security and privacy training. If an escorted person who is in the operations room manages to take the contact list without being noticed than the names, email addresses, faxes, and/or phone numbers of our points of contacts may be exposed. For this reason access control systems are in place at both Tsunami Warning Centers to prevent unauthorized access.

Section 6: Information Sharing and Access

6.1 Indicate with whom the bureau intends to share the PII/BII in the IT system and how the PII/BII will be shared. (Check all that apply.)

D	How Information will be Shared					
Recipient	Case-by-Case	Bulk Transfer	Direct Access			
Within the bureau	X					
DOC bureaus						
Federal agencies						
State, local, tribal gov't agencies						
Public						
Private sector		X**				
Foreign governments						
Foreign entities						
Other (specify):						

^{**}ISC International

Г	The DII/DII in	the aurestance resil	1 mat ha aha	
	The PH/BH in	the system wil	I not be sha	nare

6.2 Does the DOC bureau/operating unit place a limitation on re-dissemination of PII/BII shared with external agencies/entities?

X	Yes, the external agency/entity is required to verify with the DOC bureau/operating unit before redissemination of PII/BII.
	No, the external agency/entity is not required to verify with the DOC bureau/operating unit before redissemination of PII/BII.
	No, the bureau/operating unit does not share PII/BII with external agencies/entities.

6.3 Indicate whether the IT system connects with or receives information from any other IT systems authorized to process PII and/or BII.

Yes, this IT system connects with or receives information from another IT system(s) authorized to process PII and/or BII.

Provide the name of the IT system and describe the technical controls which prevent PII/BII leakage:

Contact information shared through ISC International: Stored on a password protected account on an information system that provides confidentiality, integrity, and availability controls. More information can be found here: http://www.iscinternational.com/security.php and http://www.iscinternational.com/technical/

No, this IT system does not connect with or receive information from another IT system(s) authorized to process PII and/or BII.

6.4 Identify the class of users who will have access to the IT system and the PII/BII. (Check all that apply.)

Class of Users				
General Public Government Employees			X	
Contractors	X			
Other (specify): ISC International				

Section 7: Notice and Consent

7.1 Indicate whether individuals will be notified if their PII/BII is collected, maintained, or disseminated by the system. (Check all that apply.)

X	Yes, notice is provided pursuant to a system of records notice published in the Federal Register and discussed in Section 9.		
X	Yes, notice is provided by a Privacy Act statement and/or privacy policy. The Privacy Act statement and/or privacy policy can be found at: https://www.weather.gov/privacy		
X	Yes, notice is provided by other means.	Specify how: Tsunami information: Individuals request to be added/modified/or removed from our list directly. Home telephone list is posted in the operations room and employees provide contact information. Privacy Act Statement posted beneath call roster and is on phone request form provided to employee.	
	No, notice is not provided.	Specify why not:	

7.2 Indicate whether and how individuals have an opportunity to decline to provide PII/BII.

X	Yes, individuals have an opportunity to	Specify how:
	decline to provide PII/BII.	Tsunami information: Individuals may decline by not
		volunteering the information or requesting a removal from our
		system.
		Employee information: Employees working on an on-call status are required to provide their home phone number so they may be contacted for emergencies or shift information (employee is late to start their shift so previous shift worker calls to get information).
	No, individuals do not have an opportunity to decline to provide PII/BII.	Specify why not:

7.3 Indicate whether and how individuals have an opportunity to consent to particular uses of their PII/BII.

X	Yes, individuals have an opportunity to	Specify how:
	consent to particular uses of their	Tsunami: Individuals specify whether or not they want to
		receive warning notifications, by which means. Data partners
		provide the method of contact they want for troubleshooting,
		testing, and outage notifications.
		Employees: Employees may specify that they wish for their
		home phone number to only be used on the call roster for its
		intended purpose.
	No, individuals do not have an	Specify why not:
	opportunity to consent to particular uses of their PII/BII.	

7.4 Indicate whether and how individuals have an opportunity to review/update PII/BII pertaining to them.

X	them.	Specify how: Tsunami: NTWS can be contacted by the individual to have their data changed or removed or by an official within the individual's organization, or to have a record removed or replaced, or reviewed. Employee: Employees may inform managers of a change of their home telephone number and managers will produce a rectified call down list.
	No, individuals do not have an opportunity to review/update PII/BII pertaining to them.	Specify why not:

Section 8: Administrative and Technological Controls

8.1 Indicate the administrative and technological controls for the system. (Check all that apply.)

All users signed a confidentiality agreement or non-disclosure agreement.

X	All users are subject to a Code of Conduct that includes the requirement for confidentiality.
X	Staff (employees and contractors) received training on privacy and confidentiality policies and practices.
X	Access to the PII/BII is restricted to authorized personnel only.
X	Access to the PII/BII is being monitored, tracked, or recorded.
	Explanation: Account logins are monitored on systems and access to the facilities where printed out
	records exist for use are monitored via cameras and physical security such as cipher locks (NTWC) and
	CAC readers (PTWC)
X	The information is secured in accordance with the Federal Information Security Modernization Act
	(FISMA) requirements.
	Provide date of most recent Assessment and Authorization (A&A): 7/31/2021
	☐ This is a new system. The A&A date will be provided when the A&A package is approved.
X	The Federal Information Processing Standard (FIPS) 199 security impact category for this system is a
	moderate or higher.
X	NIST Special Publication (SP) 800-122 and NIST SP 800-53 Revision 4 Appendix J recommended
	security controls for protecting PII/BII are in place and functioning as intended; or have an approved Plan
37	of Action and Milestones (POA&M).
X	A security assessment report has been reviewed for the information system and it has been determined that there are no additional privacy risks.

X	Contractors that have access to the system are subject to information security provisions in their contracts required by DOC policy.
	Contracts with customers establish DOC ownership rights over data including PII/BII.
	Acceptance of liability for exposure of PII/BII is clearly defined in agreements with customers.
	Other (specify):

8.2 Provide a general description of the technologies used to protect PII/BII on the IT system. (*Include data encryption in transit and/or at rest, if applicable*).

Contact Information on the Information System: Stored via access control mechanisms on the systems which are in a controlled operations room. Accessible to employees who are trained in NOAA's record retention training and IT security and privacy training.

Contact Information Hardcopy: Stored in a controlled operations room. Accessible to employees who are trained in NOAA's record retention training and IT security and privacy training.

Contact Information through ISC International: Stored on a password protected account on an information system. More information can be found here:

http://www.iscinternational.com/security.php and http://www.iscinternational.com/technical/Data transferred between the IS and ISC International is via https encrypted connection.

Employee info: Protected in a secured room that is CAC controlled to enter. There are also video cameras watching the doors to this room.

Section 9: Privacy Act

- 9.1 Is the PII/BII searchable by a personal identifier (e.g., name or Social Security number)?
 - X Yes, the PII/BII is searchable by a personal identifier.

No, the	PII/BII i	s not	searchable	by by	a 1	personal	identifier.

9.2 Indicate whether a system of records is being created under the Privacy Act, 5 U.S.C. § 552a. (A new system of records notice (SORN) is required if the system is not covered by an existing SORN).

As per the Privacy Act of 1974, "the term 'system of records' means a group of any records under the control of any agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual."

X	Yes, this system is covered by an existing system of records notice (SORN).			
	Provide the SORN name, number, and link. (list all that apply):			
	NOAA-11, Contact Information from Members of the Public Requesting or Providing Information			
	Related to NOAA's Mission			
	Commerce/DEPT-13, Investigative and Security Records			
	Commerce/DEPT-18, Employees Personnel Files Not Covered By Notices of Other Agencies			
	Commerce/DEPT-25, Access Control and Identity Management System.			
	Commerce/DEPT-31, Public Health Emergency Records of Employees,			
	<u>Visitors</u> , and Other Individuals at Department Locations			
	Yes, a SORN has been submitted to the Department for approval on (date).			
	No, this system is not a system of records and a SORN is not applicable.			

Section 10: Retention of Information

10.1 Indicate whether these records are covered by an approved records control schedule and monitored for compliance. (Check all that apply.)

X	There is an approved record control schedule. Provide the name of the record control schedule:			
	1307 - Weather Forecast Office & River Forecast Centers.			
	Chapter 300 – Personnel Management Files.			
	No, there is not an approved record control schedule.			
	Provide the stage in which the project is in developing and submitting a records control schedule:			
X	Yes, retention is monitored for compliance to the schedule.			
	No, retention is not monitored for compliance to the schedule. Provide explanation:			

10.2 Indicate the disposal method of the PII/BII. (Check all that apply.)

Disposal			
Shredding	X	Overwriting	
Degaussing		Deleting	X
Other (specify):			

Section 11: NIST Special Publication 800-122 PII Confidentiality Impact Level

11.1 Indicate the potential impact that could result to the subject individuals and/or the organization if PII were inappropriately accessed, used, or disclosed. (The PII Confidentiality Impact Level is not the same, and does not have to be the same, as the Federal Information Processing Standards (FIPS) 199 security impact category.)

X	Low – the loss of confidentiality, integrity, or availability could be expected to have a limited adverse
	effect on organizational operations, organizational assets, or individuals.
	Moderate – the loss of confidentiality, integrity, or availability could be expected to have a serious adverse effect on organizational operations, organizational assets, or individuals.
	High – the loss of confidentiality, integrity, or availability could be expected to have a severe or catastrophic adverse effect on organizational operations, organizational assets, or individuals.

11.2 Indicate which factors were used to determine the above PII confidentiality impact level. (Check all that apply.)

X	Identifiability	Provide explanation:
		Individuals may be identified by means of PII.
X	Quantity of PII	Provide explanation:
		There is only contact information and employee information.
X	Data Field Sensitivity	Provide explanation:
		There are no sensitive data fields.
X	Context of Use	Provide explanation:
		The contact information is used to contact individuals with
		tsunami-related information. Employee information is used for
		managerial purposes.
	Obligation to Protect Confidentiality	Provide explanation:
X	Access to and Location of PII	Provide explanation:
		Contact information is stored in the operations room behind CAC
		or PIN-enabled doors.
	Other:	Provide explanation:

Section 12: Analysis

12.1 Identify and evaluate any potential threats to privacy that exist in light of the information collected or the sources from which the information is collected. Also, describe the choices that the bureau/operating unit made with regard to the type or quantity of information collected and the sources providing the information in order to prevent or mitigate threats to privacy. (For example: If a decision was made to collect less data, include a discussion of this decision; if it is necessary to obtain information from sources other than the individual, explain why.)

If the individual in contact information no longer works in their former role, then it may be necessary for us to reach out to the organization and obtain a new point of contact, at which point the old one is removed from the system. Some organizations delegate someone on their behalf and furnish that person's point of contact information.

	12.2	Indicate whether	the conduct of this	s PIA results in an	y required business	process changes.
--	------	------------------	---------------------	---------------------	---------------------	------------------

	Yes, the conduct of this PIA results in required business process changes. Explanation:
X	No, the conduct of this PIA does not result in any required business process changes.

12.3 Indicate whether the conduct of this PIA results in any required technology changes.

	Yes, the conduct of this PIA results in required technology changes.
	Explanation:
X	No, the conduct of this PIA does not result in any required technology changes.
