## **U.S. Department of Commerce Privacy Impact Assessment USPTO Patent Cooperation Treaty Search Recordation System (PCTSRS)**

**Unique Project Identifier: [1860] PTOC-018-00**

### **Introduction: System Description**

*Provide a description of the system that addresses the following elements:*

*(a) Whether it is a general support system, major application, or other type of system*

The Cardinal IP (CIP) Patent Cooperation Treaty Search Recordation System (PCTSRS) is a general support system that performs Patent Cooperation Treaty (PCT) searches and written opinions on behalf of the United States Patent and Trademark Office (USPTO). PCTSRS provides authenticated employees access to Patent Cooperation Treaty (PCT) applications. The purpose of this system is to support the USPTO's international application or PCT application process. The PCT provides a unified procedure for filing patent applications to protect inventions in each of its Contracting States. PCTSRS facilitates PCT searches and enables CIP employees to submit an accompanying written opinion regarding the patentability of the invention in question. PCTSRS has a FIPS 199 security impact categorization of Moderate.

PCTSRS is only accessible by authenticated employees from within the CIP network. There is no public access to the PCTSRS system. PCT opinions are submitted from CIP directly to the USPTO via a secure connection. The CIP network is protected by firewalls, anti-virus, and anti-spam systems. The CIP data center facility includes physical security implementations including proximity card access controls, hand-geometry biometric locks, video surveillance, and building security.

*(b) System location*

PCTSRS production servers are located at a remote Tier III data center in Oakbrook, IL.

*(c) Whether it is a standalone system or interconnects with other systems (identifying and describing any other systems to which it interconnects)*

PCTSRS is a standalone system which only shares data between the USPTO via a secure file transport.

*(d) The way the system operates to achieve the purpose(s) identified in Section 4*

The PCTSRS system consists of several servers for web, database, backup, and directory services. PCTSRS facilitates PCT searches and enables CIP employees to submit an

accompanying written opinion regarding the patentability of the invention in question. PCT application documents and patentability opinions are transferred between CIP and USPTO via a secure file transfer system hosted and maintained by the USPTO.

*(e) How information in the system is retrieved by the user*

Users retrieve data from the system via an internal web application (not Internet facing) which is secured by TLS.

*(f) How information is transmitted to and from the system*

Information is transmitted to and from the PCTSRs system via secure FTP which is hosted and maintained by the USPTO.

*(g) Any information sharing conducted by the system*

There is no information sharing conducted by the system other than the exchange between PCTSRs and the USPTO.

*(h) The specific programmatic authorities (statutes or Executive Orders) for collecting, maintaining, using, and disseminating the information*

35 U.S.C. 1, 2, 6, 41, 115, and 261; E.O. 9424; 5 U.S.C. 301

*(i) The Federal Information Processing Standards (FIPS) 199 security impact category for the system*

Moderate

## **Section 1: Status of the Information System**

1.1 Indicate whether the information system is a new or existing system.

- ☐ This is a new information system.
- ☐ This is an existing information system with changes that create new privacy risks.  
(Check all that apply.)

2.3 Describe how the accuracy of the information in the system is ensured.

PCTSRS is an internal web docketing system that is only accessible by authenticated/authorized CIP employees. This system is not publicly accessible via the Internet. PCTSRS production servers are located at a remote Tier III data center. This data center facility uses physical security measures including proximity card access controls, hand-geometry biometric locks, video surveillance, and building security. PCT data is only accessible by properly screened CIP employees who require this data to perform their job. The PCTSRS system logs all access to PCT data. All data transfers between the USPTO and CIP are performed over encrypted connections which ensure confidentiality and data integrity.

## **Section 5: Use of the Information**

- 5.1 In the context of functional areas (business processes, missions, operations, etc.) supported by the IT system, describe how the PII/BII that is collected, maintained, or disseminated will be used. Indicate if the PII/BII identified in Section 2.1 of this document is in reference to a federal employee/contractor, member of the public, foreign national, visitor or other (specify).

The PII/BII that is collected is used to identify PCT patent applicants. The information is collected and disseminated by the Patent ingress systems owned and operated by USPTO. The PCTSRs system does not disseminate this information outside of the organization.

- 5.2 Describe any potential threats to privacy as a result of the bureau's/operating unit's use of the information, and controls that the bureau/operating unit has put into place to ensure that the information is handled, retained, and disposed appropriately. (For example: mandatory training for system users regarding appropriate handling of information, automatic purging of information in accordance with the retention schedule, etc.)

There are no known threats to privacy as a result of the use of the information and controls put in place to ensure that the information is handled, retained, and disposed of appropriately.

**Section 6: Information Sharing and Access**

- 6.1 Indicate with whom the bureau intends to share the PII/BII in the IT system and how the PII/BII will be shared. *(Check all that apply.)*

| Recipient                           | How Information will be Shared |                                     |                          |

- 8.2 Provide a general description of the technologies used to protect PII/BII on the IT system. *(Include data encryption in transit and/or at rest, if applicable).*

PCTSRS is an internal web docketing system that is only accessible by authenticated/authorized CIP employees. This system is not publicly accessible via the Internet. PCTSRS production servers are located at a remote Tier III data center. This data center facility includes physical security implementations including proximity card access controls, hand-geometry biometric locks, video surveillance, and building security. PCT data is only accessible by properly screened CIP employees who require this data to perform their job. The PCTSRS system logs all access to PCT data. All data transfers between the USPTO and CIP are performed over encrypted connections which ensure confidentiality and data integrity.

## **Section 9: Privacy Act**

- 9.1 Indicate whether a system of records is being created under the Privacy Act, 5 U.S.C. § 552a. *(A new system of records notice (SORN) is required if the system is not covered by an existing SORN).*

As per the Privacy Act of 1974, "the term 'system of records' means a group of any records under the control of any agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual."

## **Section 12: Analysis**

- 12.1 Identify and evaluate any potential threats to privacy that exist in light of the information collected or the sources from which the information is collected. Also, describe the choices that the bureau/operating unit made with regard to the type or quantity of information collected and the sources providing the information in order to prevent or mitigate threats to privacy. (For example: If a decision was made to collect less data, include a discussion of this decision; if it is necessary to obtain information from sources other than the individual, explain why.)

PCTSRS does not collect information from any sources other than the USPTO secure file transfer. There are no known threats to privacy existent in light of the information collected from the USPTO.
